2026 Vizient Connections Summit Education

Tuesday, Sept. 22

PHARMACY EXECUTIVES PEER TO PEER EDUCATION MEETING | AUDIENCE: CLIENTS (VIEW DETAILS)

Noon-2:30 p.m.

Target Audience: Chief pharmacy officers, pharmacy executives and leaders

As infusion services and pharmacy operations increasingly influence health system growth and financial performance, leading organizations are elevating pharmacy as a strategic enterprise driver. Attendees will gain insight into how infusion strategy, centralized service models and operating model redesign are being leveraged to expand access, align system priorities and optimize capacity at scale. The discussion will highlight how addressing challenges such as revenue leakage, data fragmentation and misaligned workflows can unlock significant financial and operational value. Through an executive lens, panelists will share how governance, automation and cross-functional alignment are enabling more agile, data-driven decision-making. These insights offer a clear path for strengthening pharmacy's role in advancing enterprise strategy, performance and long-term sustainability.

SUPPLY CHAIN EXECUTIVES PEER TO PEER EDUCATION MEETING | AUDIENCE: CLIENTS (VIEW DETAILS)

Noon-2:30 p.m.

Target Audience: Supply chain executives and leaders, supply chain physician partners, spend management professionals

Lean in with supply chain and spend management executives who will share their insights and expertise on advancing clinical integration, value analysis strategies, and supplier-provider relationships, as well as the growing role of artificial intelligence enablement across supply chain operations. This meeting will include panel discussions, providing a unique opportunity for you to engage with industry leaders, exchange ideas and gain valuable insights to drive innovation and improvement within your own organization.

VIZIENT RESEARCH AND ANALYTICS INSIGHTS POSTERS (VIEW DETAILS)

Interactive: 1-2 p.m. | Hall G

Vizient experts spotlight research and insights spanning clinical, operational, and equity topics using the Vizient Clinical Data Base and Vizient Vulnerability Index. Clinical quality studies examine the association between cardiac surgery volume and mortality, attributes of health system governance associated with improved performance, and strategies to reduce length of stay reduction strategies. Equity-focused analyses address behavioral health disparities, firearm injury patterns, maternal sepsis, and colorectal cancer screening uptake. Additional posters explore acute pain management, the association between social vulnerability and chronic disease hospitalization, and a framework for maternal-neonatal health. A Data on the Edge presentation will show how Vizient transforms proprietary data and expert perspective into executive-ready insights, helping health systems anticipate change, strengthen strategy, and improve organizational performance.
