

# Continuous Accreditation Compliance Service

Supporting patient safety through regulatory and accreditation compliance

## Additional services

Comprehensive gap assessments/mock surveys for CMS and TJC compliance

Mentoring programs

New construction

Emergency management

EMTALA

Workplace violence

Clinic transition to hospital-based departments

Focused service line assessments and support such as infection control, behavioral health, and facilities management

## Collaboration and solutions for compliance success

At times it can be difficult to navigate all the changes that occur related to healthcare regulations and accreditation. Vizient is here to partner with you to ensure you are always compliant.

Vizient offers networking, education, and coaching for your team to further improve their regulatory and accreditation knowledge. The information shared through the Continuous Accreditation Compliance Service (CAC) combines member experiences with the expertise of Vizient's regulatory and accreditation experts.

## CAC membership includes:

### Learn what surveyors are scoring

Vizient aggregates triennial survey reports from the CAC community. The de-identified information organized by chapter provides valuable insight into what surveyors are scoring.

### Tracer questions from Joint Commission surveys

CAC organizations provide scribe notes from their Joint Commission survey experiences that are shared with the CAC community throughout the year.

### Access to the latest news and peer experiences

Monthly Office Hour calls provide information on high priority topics, as well as individual organizations share their recent survey experiences. A newsletter is also distributed monthly that includes updates from the Office Hour calls, as well as new information in regulations and accreditation.

### Quarterly reports

Updated information is provided each quarter for any FAQ additions from The Joint Commission, as well as a repository of questions and answers to the Standards Interpretation Group (SIG) and CMS.

### Networking

Program members have access to a community website for direct peer-to-peer communication in a secure and trusted environment with additional insights provided by Vizient's regulatory and accreditation experts.

### Access to accreditation advisors

Open access to Vizient clinical and physical environment advisors throughout the year, including during your Joint Commission survey.

### Optional add-on: TJC mock survey

An annual visit from our team enables you to strategically and proactively plan and execute your solutions versus reactively or urgently following a survey. Customized options are available such as a mid-cycle deep dive assessment, a pre-accreditation follow up survey or a focused assessment.
