

Specialized and Focused Survey Readiness

Supporting patient safety through accreditation and regulatory compliance with a customized approach in gap assessments, education, and solution implementation.

Our experts are here to help

Our multidisciplinary team of subject matter experts are available to work collaboratively with you to ensure training, processes and support are in place for an effective focused program that aligns strategically with your organization.

Vizient Accreditation and Regulatory Advisory Services

Specialized and Focused Survey Readiness is a component of the [Vizient Accreditation and Regulatory Services](#), supporting patient safety through accreditation and regulatory compliance including gap assessments, education, coaching and solution implementation.

Is your organization survey ready?

Healthcare organizations strive to provide the highest quality care for their patients each and every day. Remaining in compliance of accreditation standards at all times is crucial to ensure limited disruptions to patient care in the event of an unannounced survey.

Focused programs that align with your organization

Vizient Accreditation/Regulatory Services provides a fresh eyes assessment on challenging, high risk areas of organizational compliance.

Our team of accreditation advisors is comprised of experienced clinicians and certified healthcare facility professionals who can share leading practices and solutions to specifically address your problematic areas. A visit from our team enables you to strategically and proactively plan, execute, and sustain your solutions, versus reactively and urgently implementing a short-term solution post-survey.

Focused Surveys / Compliance Assessments: Focused surveys are customized on-site assessments that are specific to your organizational needs. Examples of focused surveys include, but are not limited to:

- High Level Disinfection and Sterilization
- Dialysis
- Radiology
- Behavioral Health
- Managing Hazardous Medications and Waste
- Women's Health

An assessment of current compliance will be completed, including a comprehensive review of documentation, policies, education, and medical records. Environmental tours and staff interviews will be conducted, and on-site mentoring and education provided.
