

PRODUCT DISRUPTION BRIEF

Getinge chest drainage MS6101

Wednesday, October 8 Update: The issues that caused Getinge supply interruption have now been resolved. Getinge will remain on allocation/ship hold for the next few weeks to work through submitted orders. Getinge estimate the ship hold/allocation to be removed mid-to-end of October.

Getinge are reviewing orders & allocating product daily. In addition, Vizient providers are being prioritized during the allocation process.

Current conditions

Due to these challenges, Getinge has moved Oasis 3600-100 to temporary allocation and potential shipping delays. The challenges are anticipated to be temporary and only last through September. During this time, providers experiencing order delays could consider Teleflex substitutes A6000-08LF. Teleflex substitutes can be found on contract under Teleflex Chest Drainage agreement MS6102. Other on contract alternatives from Teleflex are A-6020-08LF and S-1130-08LF. Additional cross-references can be found in the table below. We will update this brief as recovery updates are communicated.
