

# The Vizient High-Value Network

The Vizient High-Value Network (HVN) focuses on reducing surgical spend for employers, while providing a high-quality, seamless patient experience.

## Bringing unparalleled value to employers through the nationwide network

The Vizient High-Value Network (HVN) is focused on delivering value to self-insured employers by providing their employees with appropriate, high-quality care, combined with a better experience, all at a lower cost.

The HVN provides guaranteed savings and predictability through straightforward, all-inclusive physician and facility pricing per episode of care.

Our model emphasizes all facets of the delivery of value to employers. This includes the cost to the employer of the procedure and added, often overlooked components of value such as:

 **Appropriateness of care**

 **The rapid return to work of healthy employees**

 **Minimization of complications and related readmissions**

 **Proper post-hospital discharge destination**

## Nationwide Surgical Centers of Excellence model

The Vizient nationwide high-value network continues to expand and is comprised of health systems that have been vetted as top performers based on the Vizient Clinical Data Base (CDB). The network includes many of the largest, highest quality and most respected academic and private healthcare systems in the country.

With the coast-to-coast distribution of HVN healthcare providers, employers with geographically dispersed employee concentration across the country can engage with multiple HVN organizations for the provision of care at a local, regional and/or national level.

### Vizient High-Value Network health systems

**More than 50%**

of the U.S. population is within a 2-hour drive of an HVN hospital today
