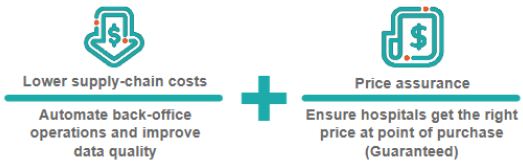
Vizient® Procure-to-Pay (P2P) Solutions

Transforming Supply Chain Efficiency for Health Systems

Our three-way support model:

- **Technology empowerment** - leverage our best-in-class tools and resources, so you can focus on patient care
- **Collaborative partnership** - work side-by-side with our experts to create tailored solutions
- **Complete outsourcing** - let us manage your entire supply chain operation for maximum efficiency

What We Do



Your challenge: paying the right price every time

Vizient P2P Solutions is designed to help healthcare clients optimize supply chain efficiencies and improve price accuracy at the point of purchase through data management, procurement, and ecommerce solutions – we guarantee it! We understand that supply chain inefficiencies lead to price errors, impacting cost savings and productivity. Challenges such as wrong prices in item files, tier misalignment and unworked PO confirmations create unnecessary complexity and financial risk.

How Vizient P2P helps you optimize your supply chain

Vizient's P2P Solutions ensures your contract price and associated savings are realized at the point of purchase. Our expert-led processes and innovative technologies integrate with all major enterprise resource planning (ERP) software in healthcare and help to align pricing between the hospital, manufacturers, group purchasing organizations (GPOs) and distributors.

End-to-end P2P solutions for maximum savings

Contract Data Feeds – daily price synchronization between GPO contract catalog and your item file

eCommerce Exchange – automate common supply chain transactions such as the PO, PO acknowledgement and invoice with suppliers who are electronic data interchange (EDI) capable and provide three-way price match (PO, Contract and Vendor) for real-time price verification

Transaction Management – automate common supply chain transaction with any supplier regardless of their size or technical capabilities. In addition, coordinating the root cause resolution for price discrepancies

Data Management Portal – standardized and enrich key item file attributes, while getting actional insights to your master data and spend

Item Master Services – expert-led service that manages your entire item file on a turn-key basis, allowing you to focus on more strategic activities
