

PRODUCT DISRUPTION BRIEF

Adhesive drapes (updated March 25)

Steri-Drape disruption resolution almost complete.

Current conditions

In Nov. 2022, 3M conducted a [voluntary recall](#) for select models and lots of Steri-Drape Surgical Drapes distributed between October 29, 2021 and August 25, 2022. 3M confirmed the liner on the adhesive component of the affected drapes is difficult to remove without damaging the product and may render the product unusable potentially resulting in related skin injuries for these affected lots. A list of effected lots is available [here](#). These products are typically placed into custom procedure trays so certain packs will also have to be recalled. If your organization has affected lots, immediately discontinue use and complete the Customer Acknowledgement Form and return to 3M.

3M has announced that select Steri-Drape Surgical Drapes products were available beginning in June 2023 and following a manual prioritization process. availability may be intermittent during the initial availability window due to backlog reductions and fluctuations to expected demand. Please work with your local 3M representative for backorder recovery dates and to help identify potential substitutes if you experience intermittent availability.

Part #	Material Description	Estimated availability
1000	3M™ Steri-Drape™ Small Towel Drape, 1000, 45 cm x 30 cm, 10 Each/Case, 4 Cases/Case	Recovered

Mitigation strategy

3M is the Vizient market leader for adhesive drapes and this product line accounts for roughly 9% of Vizient sales. As a result, this recall could potentially cause additional disruptions through the duration of the recall. 3M has provided potential substitutes for the affected products [here](#).

3M has committed to review compliance levels in this category and grant temporary compliance if the member is not meeting the quarterly potential due to the recalled products allowing members to continue to earn rebates on the 3M products available until the situation is resolved. Work with your 3M rep or reach out to Brooke Golwas (begolwas@mmm.com) for additional assistance.
