

Infection prevention decoded: Strategies to reduce risk and improve readiness

Practical tools and insights for accreditation and quality leaders, infection preventionists and clinical partners

From infection prevention regulatory and accreditation requirements to challenges in high-level disinfection, sterilization and surveillance, today's healthcare teams face an increasingly complex infection prevention environment.

This two-day, hands-on training session will help simplify what's most critical, sharpen survey readiness and build stronger collaboration with operational partners.

Who should attend

- Accreditation, regulatory and quality professionals
- Infection preventionists
- Clinical and operational leaders (inpatient and outpatient) with oversight of high-risk infection prevention activities

Key conference takeaways

- Understand current regulatory requirements and Joint Commission standards with Accreditation 360
- Gain practical tools for high-risk surveillance and compliance
- Explore strategies to strengthen cross-functional collaboration
- Build a roadmap for ambulatory infection prevention
- Improve outcomes and patient safety with actionable insights

Faculty speakers

Ahnna Parker
MSN, RN-BC, CIC
Clinical Advisor

Diane Cullen
MSN, MBA, RN,
CPHQ, CIC
Clinical Advisor
