

Ambulatory Surgery Center Regulatory Assessments

Support patient safety and optimize outcomes in ambulatory surgery centers

Our experts are here to help

Our multidisciplinary team of subject matter experts are available to work collaboratively with you to ensure training, processes and support are in place for an effective ambulatory surgery program that aligns strategically with your organization.

Vizient Regulatory and Accreditation Advisory Services

Ambulatory Surgery Center Regulatory Assessments are a component of the Vizient Accreditation and Regulatory Services supporting patient safety through accreditation and regulatory compliance including gap assessments, education, coaching and solution implementation.

Is your organization survey ready?

Recognizing all areas of your organization must be continuously ready to discuss and demonstrate patient safety through regulatory compliance is crucial to minimize disruptions to patient care during an unannounced survey.

Focused programs that align with your organization

Vizient Regulatory and Accreditation Services provides a comprehensive assessment of your organization's state of survey readiness for hospital based or independent ambulatory surgery centers. Through direct observation of practices and the environment, documentation review, and interviews advisors will identify non-compliance and support mitigation strategies with mentoring and solution implementation sessions.

Our team of advisors is comprised of experienced clinicians and certified healthcare facility engineers who can share leading practices and solutions to specifically address your noncompliant and problematic issues. A visit from our team enables you to strategically and proactively plan, execute, and sustain solutions versus reactively and urgently implementing unsustainable short-term solutions post-survey.

Ambulatory Surgery Center Regulatory Assessments

Our mock surveys are customized, on-site assessments that will be specific to your organizational needs. High risk focus areas will be prioritized in the ambulatory surgery areas including but not limited to the following:

- High Level Disinfection and Sterilization practices
- Life Safety and Environment of Care including critical air pressure relationships
- Sedation and anesthesia practices
- Medication management including USP 797 and 800 compliance
- Documentation standards
- National Patient Safety Goals
- Emergency Management

As the nation's largest member-driven healthcare performance improvement company, Vizient provides solutions and services that empower healthcare providers to deliver high-value care by aligning cost, quality and market performance. With analytics, advisory services and a robust sourcing portfolio, we help members improve patient outcomes and lower costs.
