

Regulatory New Construction Services

Ensure Life Safety Measures and Life Safety Code are met through all phases of a construction project.

Our experts are here to help

Our multidisciplinary team of accreditation advisors have combined experience of over 100 years with Life Safety Code, compliance, and construction. Our experts can help prepare and support you as we identify risks and provide resolutions to ensure compliance.

Vizient Accreditation and Regulatory Advisory Services

Regulatory New Construction Services is a component of the Vizient Accreditation and Regulatory Services, supporting patient safety through accreditation and regulatory compliance including gap assessments, education, coaching and solution implementation.

Remain in compliance before, during and after construction activities

When construction, renovation, or extensive maintenance is needed in a healthcare environment, providers must continue to provide quality care to their patients while ensuring all safety and regulatory requirements are identified and met. During normal operations, Life Safety Measures and Life Safety Code (LSC) are in place to protect the safety of patients, visitors, and employees. It is imperative for healthcare facilities to remain in compliance with these measures at all times, even through all phases of construction or renovation activities.

Maintaining regulatory expectations

The Vizient Accreditation Advisory Services team will partner with you to ensure compliance with applicable codes during pre-construction, active construction, and post-construction. We not only identify gaps, but we provide you with solutions to identified gaps and compliance with the code.

- **Pre-construction:**
 - Compliance review to applicable Life Safety Code
 - Life Safety drawing reviews
 - Assist with Pre-construction Risk Assessment (PRA) and Infection Control Assessment (ICRA), including Interim Life Safety Measures (ILSM)
- **Active construction:** Periodic field compliance review for applicable Life Safety Code, PRA mitigating actions, ILSM mitigating actions, and Infection Control mitigating actions
- **Post-construction:**
 - Punch list assist with field review to applicable safety codes and Joint Commission standards
 - Field review of applicable Life Safety Code
 - Field review of current Joint Commission standards (prior to initial Accreditation Survey)
 - Field review of current CMS Conditions of Participation (CoPs)
 - As-built drawings review / spot checks
